COMMENTS

Reasons For Allowance

The following is an examiner's statement of reasons for allowance: claim 1 defines a sewing machine including a needle drive with two meshing gearwheels where one rides on the other and is driven by the other via a continuous rotational drive. A lever connects and moves one of the gears relative to the other as they spin for overfeeding or under feeding a conveyor, which moves the materials being sewn past the moving needle. The conveyor is connected to the gearwheels and is accordingly overfed or underfed depending on the position of the lever and the movement of the gearwheels. The dependent claims further limit the structure of the sewing machine fabric feeding system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Pertinent Citations

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Marforio, Landwehr et al., and Hannemann illustrate sewing machines with conveyor belt drives portions. Hager et al. and Brown illustrate sewing machines including planetary gear systems for moving drive portions of the sewing machines.
